and Mono County Building Divisions*

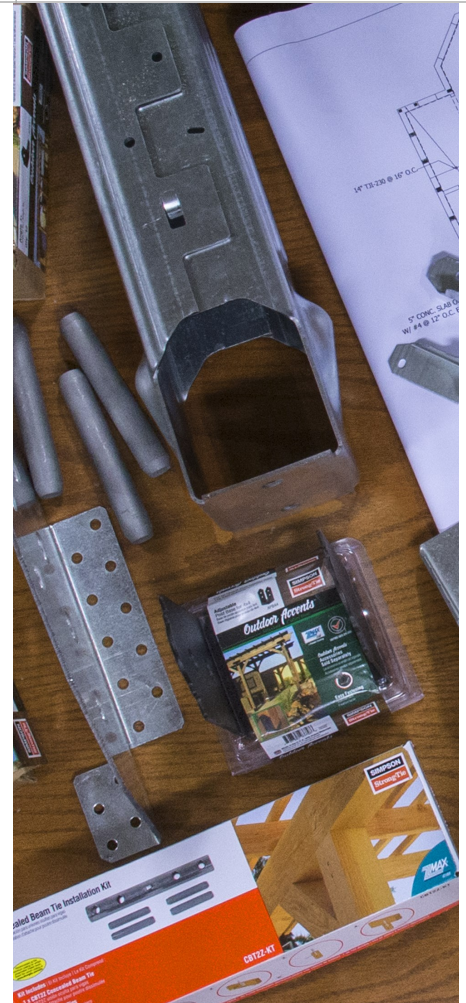

Workshop Description

This free workshop is focused on providing practical and relevant information pertaining to proper connections and uses of Simpson Strong-Tie products for continuous load path. We will discuss common construction practices, code information, new products, corrosion concerns, and effective field and design solutions.

Lateral products and solutions available such as the Strong-Wall® Wood and Steel Shearwalls and Strong Frame® Moment Frames will be presented. In addition to class discussion, we will have hands-on demonstrations of our fasteners and concrete anchor systems with structural solutions. This workshop is designed for all audiences

Registration: To register for this workshop online or to find more course listings, please visit www.strongtie.com/workshops.
